DC SUPER FLEX

GRABBER

A great no-dig tool

The Dancutter **Grabber** is a great no-dig tool for removing obstacles stuck inside pipes - a tree root, beer can, chain knocker or other tools lodged inside a pipe can slow down the work or worst case require digging up the pipe.

The Dancutter Grabber is an add-on to the DC SUPER FLEX and can be opened and closed with the grinder switch on the control unit. Powerful gripping teeth on the grabber jaws effectively hold on to the object while you pull it out, and the Grabber moves effortlessly through 45° and 90° bends in 4" - 6" / 100 - 150 mm or larger pipes.
