FPV-HEADSET

A first-person view of what your cutter camera sees inside the pipe

Dancutter's **FPV Headset** is an essential accessory when you are cutting in bright sunlight with the DC SUPER FLEX or DC MAXI FLEX.

The high-quality headset has an ultra-immersive field of view, an integrated 32-channel wireless receiver, built-in SD card support to 32 GB (AVI file), and USB charging.

With the headset, we have focused on usability first by letting the cutter operator enjoy the full FPV experience without worrying about extra charging cables or accessory components.

Included onboard DVR, uses an integrated channel scanner to pick up the strongest video feed, and has an improved 800 × 480 TFT resolution display for a crisper image. The onboard OSD shows video signal strength, battery lifetime, and selected channel.
