DC SUPER FLEX

HANGING CLAMPS

Provide easy handling when working in vertical pipes

The Dancutter **hanging clamps** are designed for mounting on the DC SUPER FLEX and provide easy handling when working in vertical pipes. With the hanging clamps attached to the yellow hose, the weight of the cutter is supported by a powerful steel wire, instead of being carried by the hose.

This accessory will reduce the risk of damage to the cutter hose because you avoid putting excessive strain on it when raising and lowering the cutter. The hanging clamps with steel wire allow the weight of the cutter to be carried by hand or attached to a strap on a winch.
